

ABOUT ME

With a strong desire for personal growth and willingness to learn I add value by finding opportunities to upskill to meet demands and solve problems. I've invested into developing new skills and gaining knowledge and insight in order to overcome challenges and problems I've faced across the different sectors I've worked in as well as my personal life through my hobbies and interests.

EXPERIENCE

WEB-DEVELOPER

KapX media consult

June 2022 - February 2023

Delivering client projects from end to end by designing and building websites using a variety of software packages. My skills range from concepting and wireframing in Figma to development in visual basic. I would communicate with clients and tailor requests to feedback to ensure satisfaction at project completion. To continue my professional development, I undertook courses and coding alongside my general work.

KEY SKILLS USED IN THIS ROLE:

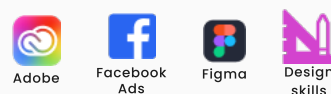

DIGITAL MARKETER

Daytime Healthcare recruitment

December 2021 - June 2022

Using a combination of design tools, I created content for social campaigns. I trained and upskilled myself to use the Adobe Creative Cloud and Figma. Managing the corporate social channels including Facebook. This gave me ownership of Facebook adverts and more diverse page content to promote conversions.

KEY SKILLS USED IN THIS ROLE:

CONTENT CREATOR

Networthpick magazine

February 2021 - September 2021

Collaborating with a team of creatives to generate content for the digital magazine. Leading and participating in regular brainstorming sessions allowed me to research and respond to market trends. I travelled to different locations to gather content for articles, including conducting interviews and taking videos and photos.

KEY SKILLS USED IN THIS ROLE:

INDUSTRIAL ELECTRICIAN

Neilcott Construction

January 2014 - December 2019

Operating on commercial and industrial sites, my apprenticeship gave me a strong foundation to grow as an industrial electrician. I developed both personal and professional skills. Due to being a fast learner, I opened myself to further professional opportunities, taking on large-scale, complex projects for public sector organisations.

KEY SKILLS USED IN THIS ROLE:

EDUCATION

BARKING & DAGENHAM COLLEGE

NVQ Level 3. Electrotechnical Installation (501/2232/0)
NVQ level 3 Electrical requirements BS 7671

ESTIO TRAINING PROVIDER

BCS Level 3 Certificate in Marketing Principles (603/0763/8)
BCS Level 3 Award in Principles of Coding (603/0762/6)

COLEGIO SIGLO XXI (SPAIN)

primary and secondary school

CODING

Whilst working in digital market I was learning how to optimise the company website. I decided in my free time to learn about how websites work and then decided to build my personal website from the ground up.

BARBERING

During lock I took the time to learn how to cut, fade and line-up hair. My brother and I haven't been to a barbers since.

HOBBIES AND INTERESTS

PC BUILDING

My old computer started to slow down due to low memory. Looking into replacement parts turned into learning how to build a whole gaming computer.

MOTORCYCLES

After COVID-19 getting my licence proved to be difficult with a lack of instructors and tests. After researching, I realised that a motorbike license would cost me less than TFL and offer me more freedom.
